MARSHALL: develop scaling and modularizing laws for HDV batteries or FCs

My work: focus on HDV battery

1

VECTO and EMR of Battery Heavy-duty vehicle

2

Dynamical electro-thermal model of battery cell

3

Conclusion and Perspective

EMR'25, Lille (France)

«Vehicle Energy Consumption calculation TOol (VECTO) and EMR of Battery Heavy-duty vehicle»

- Simulation tool deployed by the European Commission
- Used to determine CO₂ Emissions and Energy Consumption of HDV

Trucks

Coaches

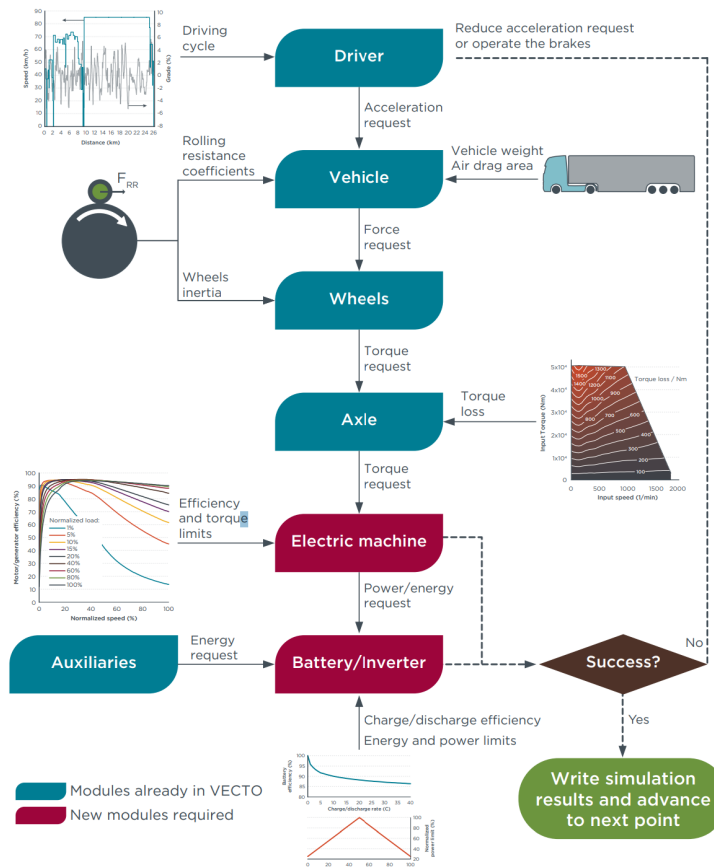

Buses

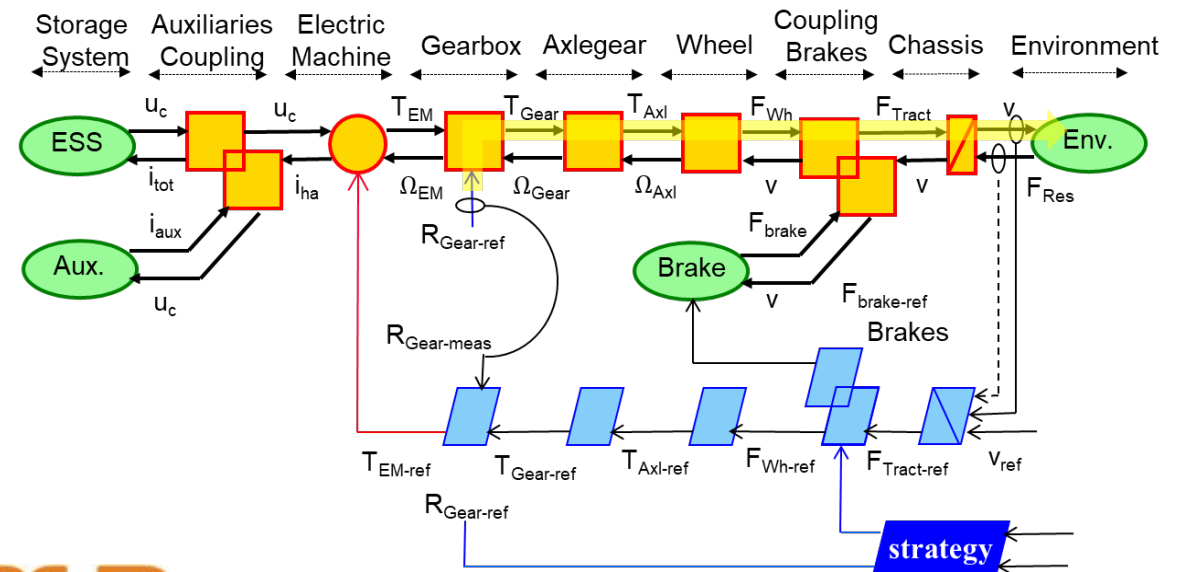

Gross Vehicle Weight > 3500 kg

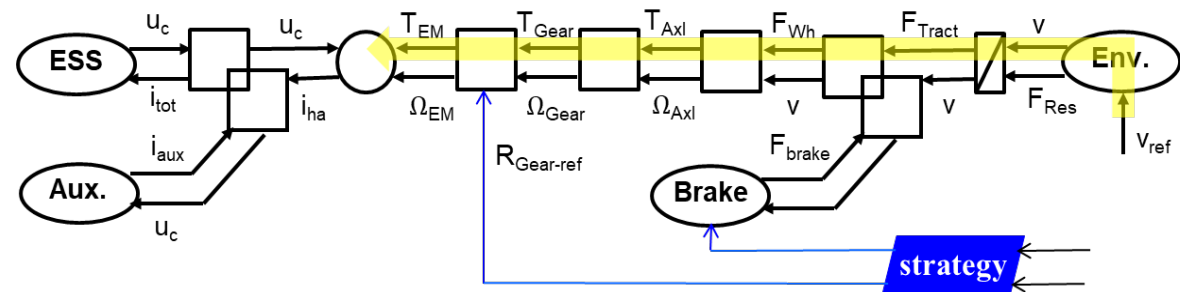

Energy consumption

EMR: Forward description

Backward description based on EMR

EMR-based Scaling of Batteries

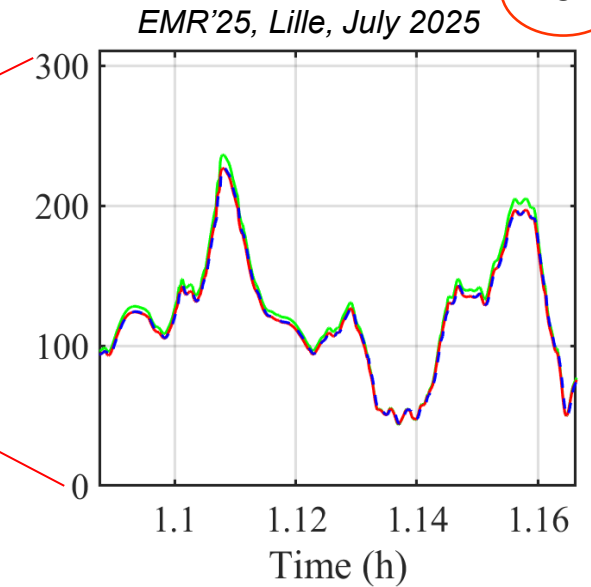

Comparison of 3 representations

«DYNAMICAL ELECTRO-THERMAL (E-T) MODEL OF BATTERY CELL»

[German 2020]

EMR-based Scaling of Batteries

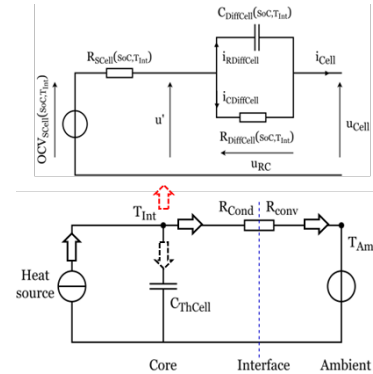

Methodology

EMR'25, Lille, July 2025

10

Winston cell

Modeling

Model type:
Equivalent Electrical Circuit
(grey-box)

Electrical model:
Thevenin 1 RC

Thermal model:
Model RC

Coupling dynamical electrical
- thermal model

EMR

Representation coupling
dynamical electrical - thermal
model

Representation electrical
parameters = $f(SoC, T_{Int})$

Simulation

Model validation:
Using a real driving cycle
and
Comparison under various
temperature conditions.

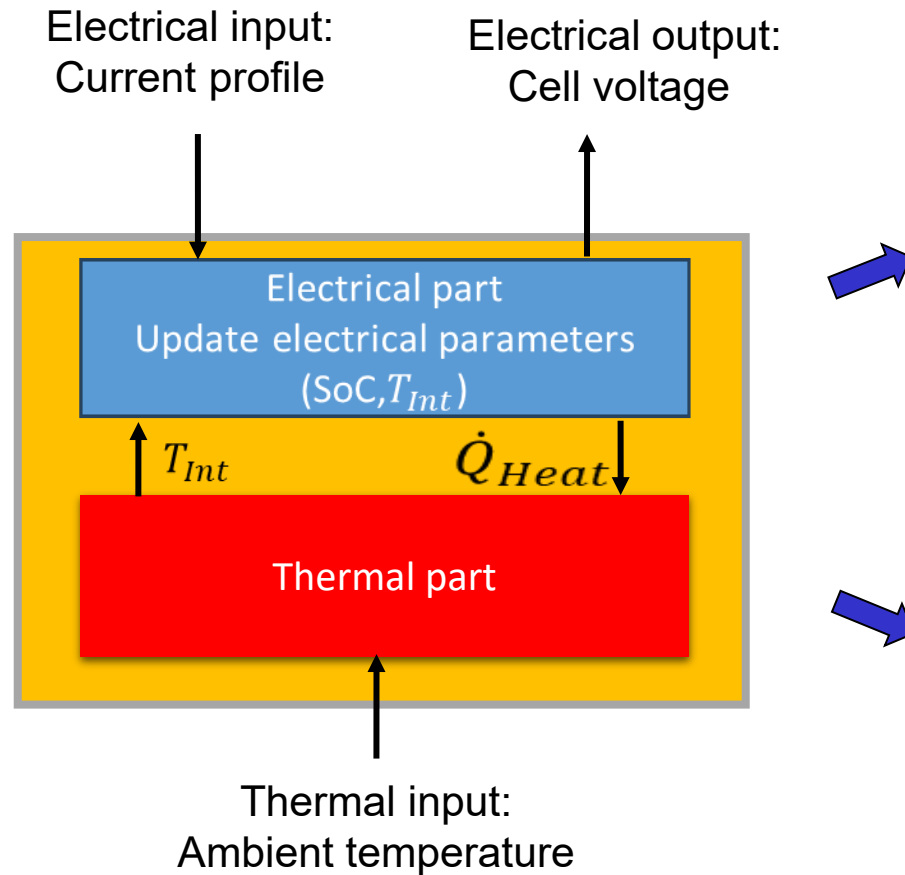

Model:
TSWB-LYP160AHA

Nominal Capacity:
160Ah

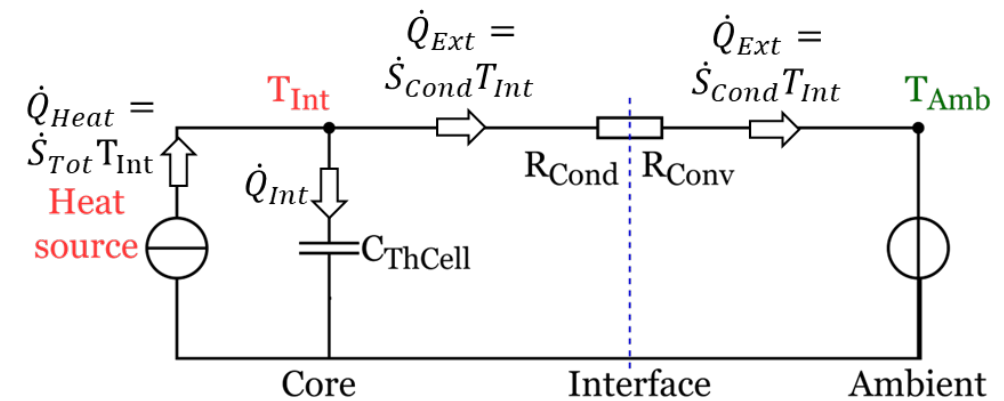

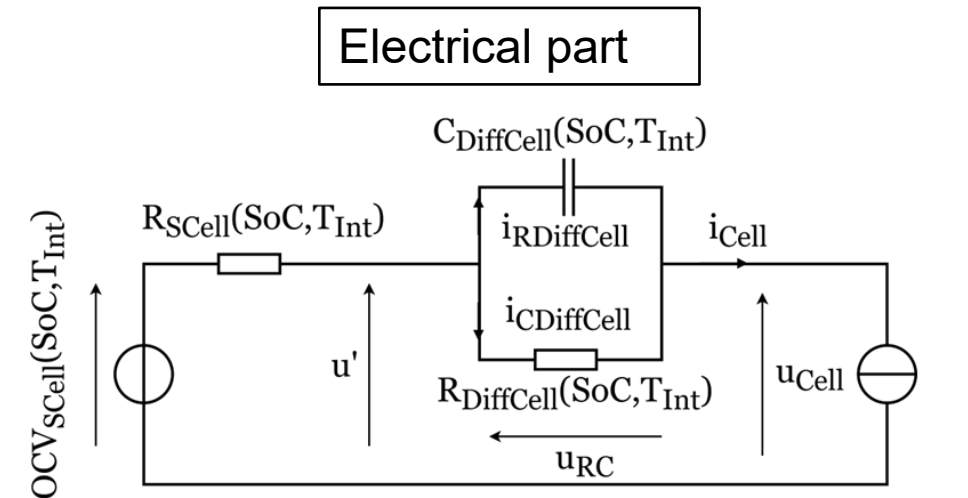

Operation Voltage:
2.8 – 3.8 V

Operation Temperature:
- 45°C – 85°C

□ Principle interaction of one cell

□ Equivalent Electrical Circuit

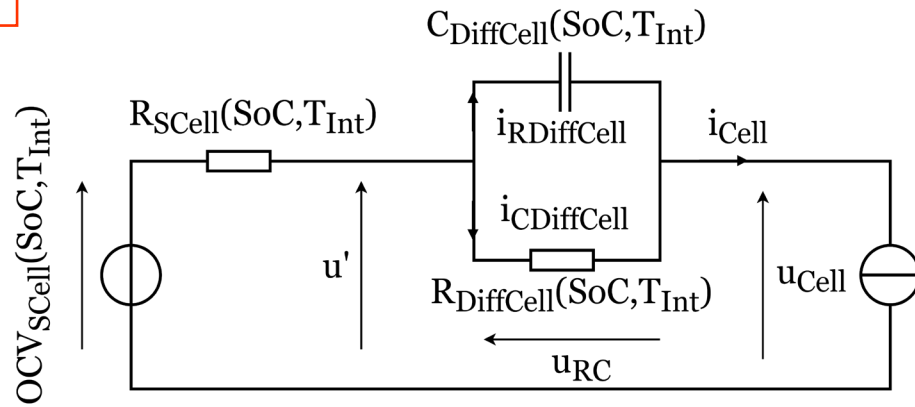

Thermal part

EMR-based Scaling of Batteries

EMR of Dynamical E-T Model

EMR'25, Lille, July 2025

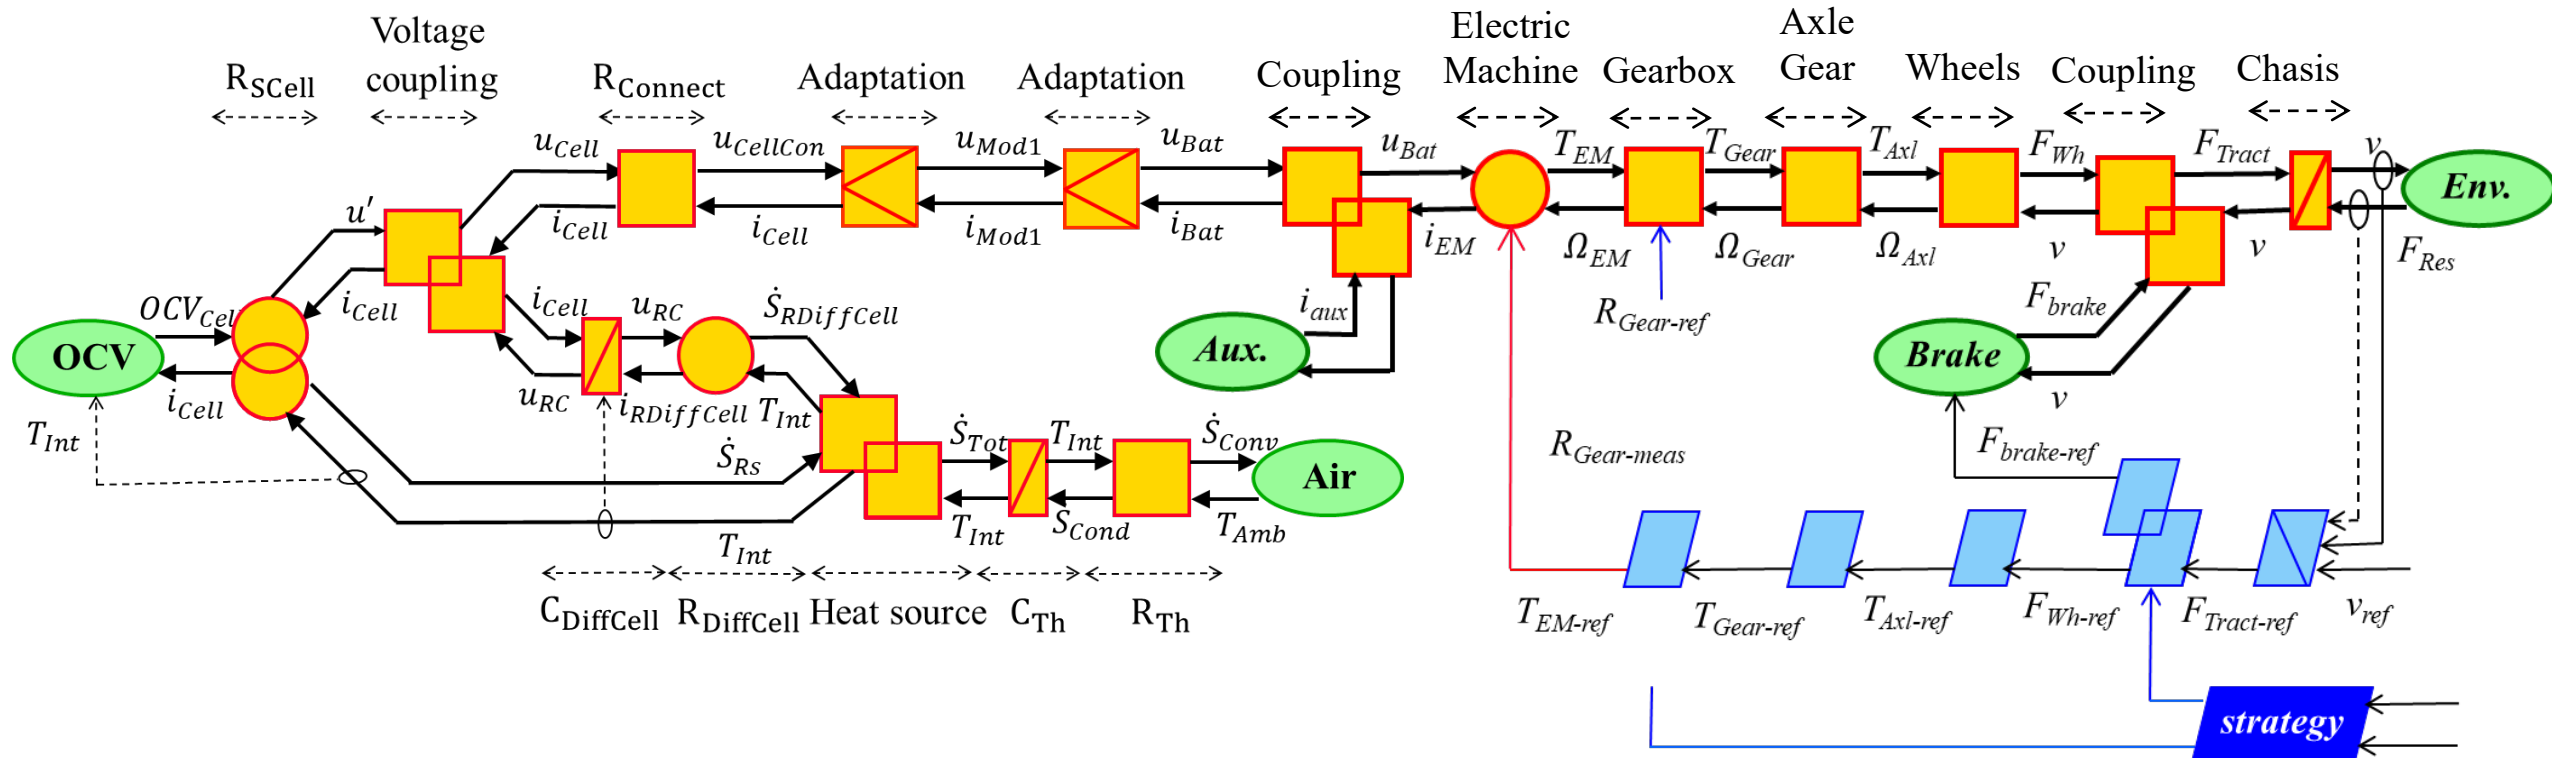

12

$$\dot{Q}_{Heat} = P_J = R_{S_{Cell}} i_{Cell}^2 + R_{DiffCell} i_{R_{DiffCell}}^2$$

$$\dot{S}_{Tot} T_{Int} = \dot{S}_{Rs} T_{Int} + \dot{S}_{R_{DiffCell}} T_{Int}$$

Integration of electro-thermal cell model into the HDV model

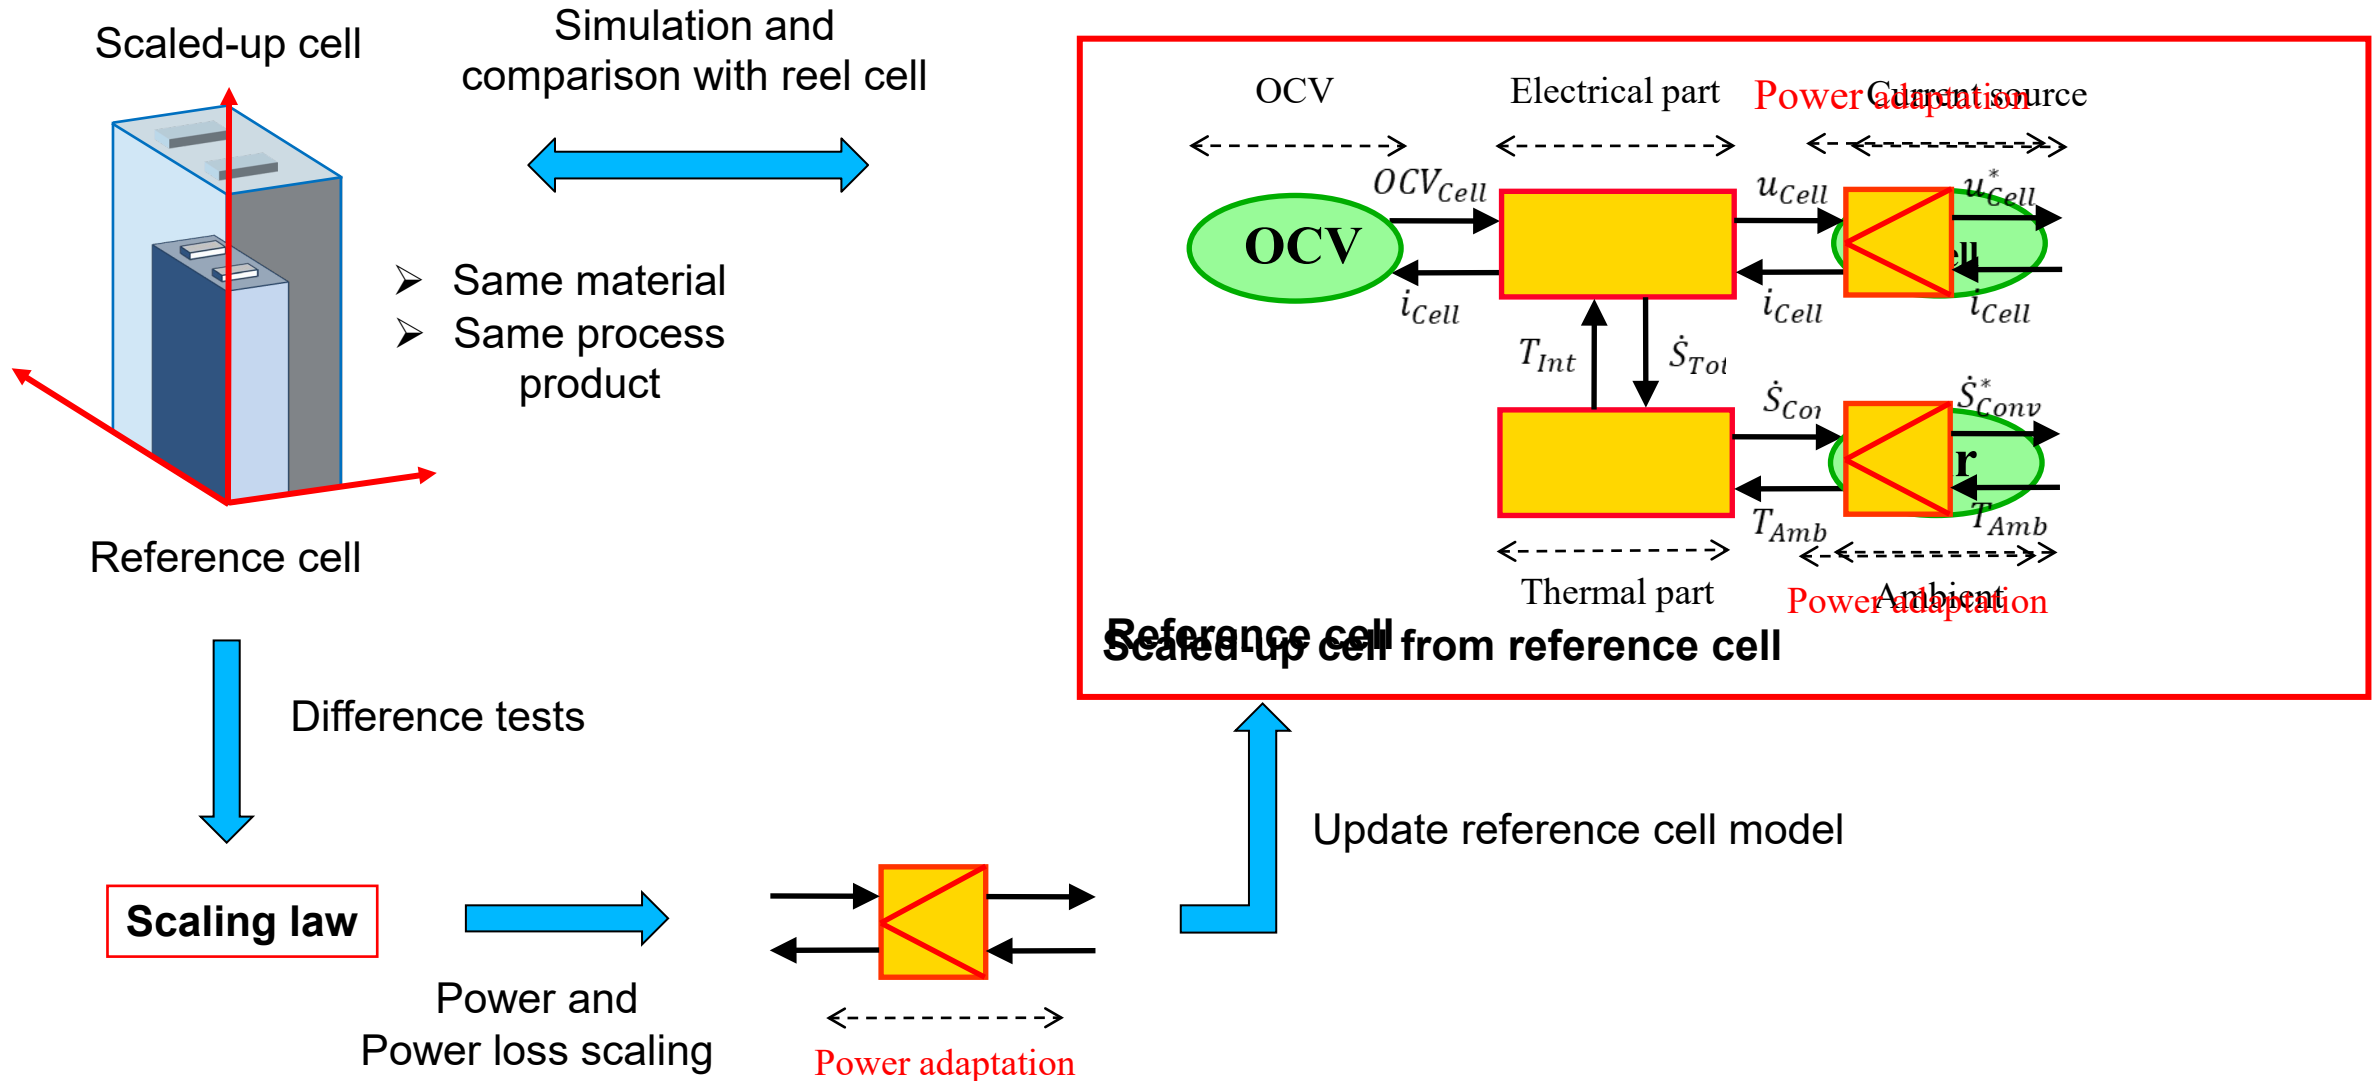

to be achieved...

EMR'25, Lille (France)

« CONCLUSION AND PERSPECTIVE »

- ❑ Simulation and comparison of 3 representations HDV (VECTO, EMR, EMR Backward)
- ❑ EMR facilitates the representation of interconnected multi-physics for electro-thermal model
- ❑ Integration of a dynamic electro-thermal battery model into the HDV model

EMR'25, Lille (France)
